

CHRISTA RUSANGANWA INGABIRE

Kigali, Rwanda | christaingabire00@gmail.com | [LinkedIn](#) | [GitHub](#) | [Website](#)

PROFILE SUMMARY

Data Analytics Engineer with experience designing scalable data systems across public-sector and enterprise environments in Rwanda and the United States. Passionate about applying data engineering, machine learning, and analytics to improve social protection, governance, and business outcomes

EDUCATION

Saint Mary's University of Minnesota – B.A. in Computer Science, Minor: Business Analytics | Winona, Minnesota, USA | August 2019 – May 2023

- Magna Cum Laude - GPA: 3.84/4.00 - Full Scholarship
- Dean's List: 7 of 8 semesters
- Relevant Coursework: Data Mining for Decision Making, Data Analysis and Business Modeling, Data Structures & Algorithms, Database Design, Systems Design, Reasoning with Statistics, Discrete Mathematics, Web Systems

Woodlands Academy of the Sacred Heart - High School Diploma | Lake Forest, Illinois, USA | August 2017 – June 2019

TECHNICAL SKILLS

- **Programming & ML:** Python (pandas, NumPy, scikit-learn, matplotlib, Jupyter), SQL, JavaScript, TypeScript, React
 - **Data Engineering:** dbt, Airbyte, ClickHouse, PostgreSQL, ETL/ELT pipelines, cron jobs, Linux servers, data modeling
 - **Visualization:** Apache Superset, Power BI, Tableau, Kibana, Matplotlib, Streamlit
 - **Other:** Git/GitHub, Agile/Scrum, SHA-256 anonymization, REST APIs
-

PROFESSIONAL EXPERIENCE

Data Engineer | Rwanda Social Security Board (RSSB) | Kigali, Rwanda | May 2025 – Present

- Designs and maintains scalable ELT pipelines supporting Rwanda's national social protection systems across health insurance, pensions, savings, and benefits programs using dbt, Airbyte, and ClickHouse
- Builds production-grade dbt models and automated cron job workflows processing large-scale citizen and claims datasets to improve data accessibility and reporting efficiency
- Develops Apache Superset analytics dashboards monitoring performance indicators across CBHI (universal health insurance), EjoHeza (long-term savings), and other national schemes
- Implements SHA-256 anonymization for privacy-preserving analytics on sensitive citizen data
- Serves as cross-scheme data liaison, standardizing data definitions and supporting strategic decision-making across multiple social protection domains

Associate Software Developer Consultant | LogiSolve | Minneapolis, Minnesota, USA | June 2023 – November 2024

- Optimized SQL stored procedures and SSRS reports for Coborn's retail operations, improving query speed and KPI reliability
- Documented 20+ transactional data flows for Surescripts e-prescribing platform using XML analysis, enhancing data governance and transparency
- Developed scripts to flatten XML fields into Excel reports for the Data Governance team
- Transitioned from QA testing into full-stack development, contributing to backend integrations and WordPress/Mailchimp automation

Data Science Intern | Rwanda Information Society Authority (RISA) | Kigali, Rwanda | May 2022 – August 2022

- Built Logstash pipelines and Kibana dashboards for the Government Business Intelligence System, integrating data from the Agriculture and Education ministries
- Processed and visualized multi-year datasets tracking school enrollment and agricultural output to enhance national policy monitoring

TECHNICAL PROJECTS

Social Protection Data System Simulation | Open Source Independent Project, 2025

Built end-to-end ETL pipelines using synthetic citizen-level data to model enrollment, benefits, and coverage inequality for Rwanda-inspired social protection systems. Includes Streamlit dashboard and predictive model

PricePulse – African Food Price Analysis | Independent Data Engineering Project, 2025

Python pipeline and Streamlit dashboard unifying 36,000+ food price observations from 404 markets across six African countries (2007–2025) to analyze regional price volatility and food security trends

Public Health ETL Report | Independent Portfolio Project, 2025

End-to-end pipeline examining life expectancy, immunization, and maternal mortality across four African countries (1960–2020) using World Bank data, Python, SQL, Seaborn, and Matplotlib

Senior-Year Machine Learning Projects | Academic 2023

- Loan Approval Prediction (scikit-learn): Binary classifier achieving ~85% accuracy on financial dataset
- Video Game Success Prediction: Modeled 3M+ Google Play records; classifier at 67% accuracy
- Workforce Stability Analysis: Analyzed staffing vs. revenue for 1,420 Fastenal branches with actionable insights

AWARDS AND LEADERSHIP

- Outstanding Senior Award (Finalist), Saint Mary's University of Minnesota, 2023
- President, MIX (Merging Intercultural Experiences), Saint Mary's University of Minnesota, 2022–2023
- Resident Assistant, Saint Mary's University of Minnesota, 2020–2023
- STEM Mentor, St. Olaf Upward Bound: Guided underrepresented students in STEM and college preparation, 2023–2025
