

CHRISTA RUSANGANWA INGABIRE

Kigali, Rwanda | christaingabire00@gmail.com | +250 788 936 366 | [LinkedIn](#) | [GitHub](#) | Date of Birth: November 17, 2000 | Marital Status: Single

PROFILE SUMMARY

Data Analytics Engineer with a proven record of developing scalable data systems, automating pipelines, and transforming complex datasets into meaningful insights. Skilled in Python, SQL, and data visualization tools such as Superset and Power BI. Experienced in managing large national datasets and collaborating on cross-functional data projects. Driven by a passion for applying data and machine learning to solve real-world challenges in governance, sustainability, and business innovation

EDUCATION

Saint Mary's University of Minnesota – B.A. in Computer Science, Minor: Business Analytics | Winona, Minnesota, USA | Magna Cum Laude | GPA: 3.84/4.00 | August 2019 – May 2023

Relevant Coursework: Data Mining for Decision Making, Data Analysis and Business Modeling, Data Structures & Algorithms, Database Design, Systems Design, Reasoning with Statistics, Discrete Mathematics, Web Systems

Woodlands Academy of the Sacred Heart - High School Diploma | Lake Forest, Illinois, USA | August 2017 – June 2019

TECHNICAL SKILLS & STACK

- **Programming & ML:** Python (pandas, NumPy, scikit-learn, matplotlib, Jupyter), SQL
- **Data Engineering:** dbt, Airbyte, ClickHouse, PostgreSQL, cron jobs, Linux servers
- **Visualization:** Superset, Tableau, Power BI, Kibana
- **Other:** Git/GitHub, Agile/Scrum

PROFESSIONAL EXPERIENCE

Rwanda Social Security Board (RSSB) – Data Engineer | Kigali, Rwanda | May 2025 – Present

- Automate ELT workflows for social protection schemes and products (CBHI, RAMA, EjoHeza, etc.) using dbt, Airbyte, and ClickHouse
- Build and schedule dbt models and cron jobs to process large-scale national datasets across health, savings, and insurance domains
- Develop Superset dashboards for CBHI (universal health insurance) and EjoHeza (long-term savings), with upcoming projects for Pension, Occupational Hazards, MLB, and RAMA
- Apply SHA-256 anonymization to sensitive data fields for privacy and secure analytics
- Serve as liaison for cross-scheme data requests, ensuring standardized and high-quality datasets for strategic analysis

Logisolve – Associate Software Developer Consultant | Minneapolis, Minnesota, USA | June 2023 – November 2024

- Optimized SQL stored procedures and SSRS reports for Coborn's retail operations, improving query speed and KPI reliability
- Documented 20+ transactional data flows for Surescripts (e-prescribing) using XML analysis to enhance governance and transparency
- Developed scripts to flatten XML fields into Excel reports for the Data Governance team
- Transitioned from QA testing to full-stack development, contributing to backend integrations and WordPress/Mailchimp automation

Rwanda Information Society Authority (RISA) – Data Science Intern | Kigali, Rwanda | May 2022 – August 2022

- Built Logstash pipelines and Kibana dashboards for the Government Business Intelligence System (GBIS), integrating data from the Agriculture and Education ministries
- Processed and visualized multi-year datasets to track indicators such as school enrollment and agricultural output, enhancing policy monitoring

Saint Mary's University of Minnesota IT Services – Helpdesk Technician | Winona, Minnesota, USA | May 2021 – August 2021

- Provided hardware, software, and network support to students and staff
- Improved system documentation and response times through proactive troubleshooting

TECHNICAL & ANALYTICAL PROJECTS

Social Protection Data System Simulation: Open Source Independent Project, 2025

Developed an AI-driven data simulation inspired by Rwanda's Social Security Board systems. Built end-to-end ETL and analytics pipelines using synthetic citizen-level data to model enrollment, benefits, and coverage inequality. Created a Streamlit dashboard and predictive model demonstrating how data systems can inform inclusive social protection policy

PricePulse – Data Pipeline & Dashboard for African Food Price Analysis: Independent Data Engineering Project, 2025

Built a Python-based data pipeline and interactive Streamlit dashboard unifying 36,000+ food price observations from 404 markets across six African countries (2007–2025). Normalized prices (Index 2019 = 100) to uncover regional trends, volatility, and market linkages in African food systems

Public Health ETL Report: Independent Portfolio Project, 2025

Developed an end-to-end data engineering and analytics pipeline examining life expectancy, immunization, and maternal mortality trends across four African countries (1960–2020). Extracted and transformed World Bank data using Python and SQL; visualized longitudinal public health progress through Seaborn and Matplotlib

Senior-Year Machine Learning Projects (2023)

- Loan Approval Prediction (Python, scikit-learn): Built binary classification model (~85% accuracy) using financial dataset; analyzed drivers of loan approval and visualized correlations
- Video Game Success Prediction (Python): Cleaned and modeled 3M+ Google Play records; trained classifier (67% accuracy) to identify app success factors and retention strategies
- Workforce Stability & Revenue Analysis (Python): Analyzed staffing vs. revenue for 1,420 Fastenal branches; visualized correlations and produced actionable business insights

AWARDS AND LEADERSHIP

- Outstanding Senior Award (Finalist), Saint Mary's University of Minnesota (2023)
- Dean's List (7/8 Semesters), Saint Mary's University of Minnesota
- President, MIX (Merging Intercultural Experiences) (2022-2023)
- Resident Assistant: Mentored 45+ students and organized academic development programs , (2020-2023) Saint Mary's University of Minnesota
- STEM Mentor, St. Olaf Upward Bound: Guided students in STEM learning and college preparation (2023-2025)
